## ACADEMIC PROJECTS

### Car Wash Appointment System

This project demonstrates your proficiency in developing a comprehensive full-stack web application, encompassing user authentication, role management, and a range of CRUD operations. It highlights your expertise in Node.js, Express.js, MongoDB, and front-end templating utilizing Pug. Additionally, it showcases your proficiency in secure password handling, session management, and user feedback through flash messages. The project includes functionalities for managing user roles, including administrator and customer, and demonstrates your ability to manage diverse user permissions and access levels. It integrates payment processing and handles asynchronous operations with comprehensive error handling.

### iOS BookStore

This project demonstrates proficiency in React Native, Firebase, API integration, and mobile app development best practices. It showcases the ability to build a full-featured, intuitive mobile application with a clean and responsive UI. The app includes user authentication, book browsing, cart management, profile overview, and book reviews, all integrated seamlessly with Firebase and external APIs.

## ADDITIONAL SKILLS

- Brainstorming, Flexibility, Critical thinking, Problem-solving, Teamwork, Self-motivated, Strong Communication; Team Collaboration Leadership, and Analytical thinking
